

## EXCHANGES

The most secure way to move funds from one bank/jurisdiction to another may be by negotiating with someone willing to take your funds where they are in exchange for providing you funds where you want them.

The easiest way to find someone willing to do that may be to aid someone to obtain profits in the bank/jurisdiction where you want funds, who is also willing to exchange profits for funds where you have your funds.

The easiest way to do that may be to invite entities to participate in the WAKING UP protocol... creating profits for themselves that they are willing to exchange for your funds.

The easiest way to do that may be to help "END BUYERS" find entities ready, willing, and able to participate in a plan involving issuing securitized MTN to obtain an immediate profit of \$25 Billion UNITED STATES DOLLARS.

WHY NOT LEARN HOW?
